Vauxhall / Opel							
Please question your customers about the terminal fittings used on their vehicle. (i.e. conv./post/pin). Some vehicles have conventional fit distributor cap and pin type coils etc. Another common problem is the vehicle has been fitted with the incorrect distributor cap at some stage during a service or repair i.e. it has a conventional fit type, where it should have a pin fit type. This obviously causes a lot of problems as a lead set is also fitted at the same time to match the incorrect distributor cap.							
Engine codes and application notes are the only method we use to recognise the correct lead set for your car - please use them.
